To Investors,

We at the Government of Islamic Republic of Afghanistan (GoIRA) welcome both national and international investors, to look at investment opportunities across different industries in Afghanistan. Afghanistan's legal and regulatory framework has been modified and expanded to accommodate huge investments, creating a protected and favorable environment for investors. The laws and regulations of Afghanistan create an optimal environment for foreign direct investment. With flat corporate tax rate, 100% foreign ownership and no restriction on capital repatriation, minimum tariff to import raw material, Afghanistan is one of the most FDI friendly destinations in the region.

Recently the Government of Islamic Republic of Afghanistan (GIRoA) has taken milestone steps to develop competitiveness of Afghanistan industries. This includes investment plans in our cement, agriculture, and power sectors. For example, GoIRA recently signed a MOU with a Turkish Company to extend the Kajaki hydropower dam. Regarding cement sector, two plants (Herat & Samangan) are put out to tender. The main objective behind GIRoA endeavor is to attract domestic and foreign investments in the untapped sectors of Afghanistan in order to promote investments.

The Office of the President of Islamic Republic of Afghanistan is keen to develop a mutually beneficial cooperation mechanism with investors to develop these strategic industries. We have prepared a series of investment presentations to help you make informed decision. We would welcome your extensive experience and investments.

Sincerely,

Ajmal Ahmady
